SASPAC EDUCATION RESOURCE PACKAGE

SASPAC has been a trusted name in education management since 1979 and is a leading developer of school management software.

The combination of ongoing research and development, together with our in-depth understanding of education management means that you can trust **SASPAC** to provide you with an effective management system.

With the advent of Microsoft Windows, a need was expressed by schools to have the product converted to operate in this environment. The development of the Windows version began in July 1999, and in January 2001 comprehensive beta testing started for a period of 6 months at schools that were prepared to act as beta-sites. Due to the wide-ranging platforms present in schools, SASPAC for Windows has been designed to run on Windows 98, NT, 2000, XP and Vista in either stand-alone or multi-user mode. In a networked environment there are no limitations to concurrent user access.
